Synbiont Joins SWRHA Team!

Synbiont Sponsors Southwest Reining Horse Association Futurity Mare Bonus

Synbiont Agricultural Wash has joined the family of supporters of Southwest Reining Horse Association Futurity and Show presented by Billingsley Ford. This 31-year-old event, regularly one of the top shows on the National Reining Horse Association's yearly schedule, returns October 20-25 to the Hardy Murphy Coliseum in Ardmore, Oklahoma.

"We are so pleased to welcome Synbiont Ag Wash to our family of sponsors as the presenter of the Futurity Mare Bonus," said SWRHA Show Manager Cheryl Cody. "It's a fitting partnership as Hardy Murphy already uses Synbiont for cleaning the facility!"

Synbiont Ag Wash is a versatile, multipurpose cleaning product for large animals and their surroundings. Used to clean areas that are prone to host pathogens, viruses, bacteria and fungi, Synbiont Ag Wash can be applied to the animal itself, facilities, stalls, kennels, bridles, bits, water buckets, feeders and places where animals frequent. Unlike a disinfectant, it cleans an area in two ways: First it cleans the host area where pathogens grow by emulsifying dirt and soil; then it compromises the cell walls of the pathogen. For information visit the website at www.synbiontagwash.com.
